SUMMARY

I build data-driven decision material and get organisations to actually use it. Analyst and advisor with experience across investment analysis, valuation, controlling and business development since 2007, most recently leading analytics at Jernhusen: built a BI platform from scratch, introduced AI-assisted ways of working and publish weekly training articles. The industry has been real estate, the toolbox is universal: data, finance, pedagogy and a stubborn urge to make the difficult simple.

EXPERIENCE

Jernhusen (Stockholm)

2017 – present

Head of Analytics (2025 –), Senior Business Controller (2017 – 2024)

- Own the quarterly valuation of the entire property portfolio since 2020, a period in which the portfolio grew from SEK 17.9 to 28 billion
- Built and launched the company's Power BI platform from scratch and led the digitalisation of the analytics function: 40+ reports, used regularly by 70% of the company
- Investment appraisal and decision support for Centralstaden Stockholm, one of Sweden's largest urban development projects (over SEK 20 billion), plus depot and station development projects
- Initiated and delivered the disposal of an asset in 2026 at a sale price 69% above book value; ran the analysis for the acquisition of a SEK 200 million office asset in Gothenburg, closing Q3 2026
- Work directly with the CEO and CFO on strategic decisions and prepare material for management and the board
- Drive AI adoption across the organisation and train colleagues in AI-assisted ways of working

Unibail-Rodamco (Stockholm)

2012 – 2017

Asset Manager (2014 – 2017), Analyst (2012 – 2014)

- Responsible for a portfolio of six office properties totalling 65,000 sqm: budget, forecast and result follow-up including leasing and tenant negotiations
- Improved reporting, budgeting and forecasting processes, giving faster and more detailed leasing reporting

Beleon (Prague)

2010 – 2011

Founder & CEO

- Founded and ran a company delivering LED lighting solutions including financing, with full P&L and staff responsibility
- Built a supplier network with four manufacturers in Southeast Asia; delivered projects saving 500,000 kWh per year

Mint Investments (Prague)

2007 – 2010

Business Developer (2008 – 2010), Investment Analyst (2007 – 2008)

- Coordinated three land acquisitions totalling 150,000 sqm for development: ran due diligence and owned the analysis and decision material for the investment committee
- Developed three real estate projects totalling 105,000 sqm from acquisition to zoning; negotiated with tenants and drove the turnaround of a distressed shopping centre (26,000 sqm, Slovakia)
- Built the firm's internal investment model, improving the decision and follow-up process

EDUCATION

Charles University (Prague): MSc Economics (Finance), CEFRES scholarship for thesis on real estate funds; BSc Economics, Vavrousek Award for environmental economics thesis; BA International Relations

London Business School: Data Science for Business Intelligence

Exchange studies: Université de Nice Sophia-Antipolis; Goethe Universität Frankfurt (Erasmus, Finance); Quinter High School (USA)

LANGUAGES

Swedish – fluent (B2 Swedex) | English – fluent | French – fluent (C1 DALF) | German – very good | Spanish, Russian, Slovak – good | Czech – native

SKILLS

Excel (advanced), Power BI, AI tools, financial / ERP systems, investment appraisal and financial modelling (IRR / NPV)
